Please See Extra Sheet.

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.

BOX II. OBSERVATIONS WHERE UNITY OF INVENTION WAS LACKING

This ISA found multiple inventions as follows:

This application contains the following inventions or groups of inventions which are not so linked as to form a single inventive concept under PCT Rule 13.1. In order for all inventions to be searched, the appropriate additional search fees must be paid.

Group I, claim(s) 1-2, 9-10, 24-25, drawn to first compounds and their methods of use.

Group II, claim(s) 3-4, 11-12, 26-27, drawn to second compounds and their methods of use.

Group III, claim(s) 5-6, 13-14, 28-29, drawn to third compounds and their methods of use.

Group IV, claims 7-8, 15-16, 30-31, drawn to fourth compounds and their methods of use.

Claims 17-23 and 32-40 are drawn to methods of use. They are multiple dependent claims and embrace the subject matter of groups I-IV. Therefore they are not classified in any of the groups.

The inventions listed as Groups I-IV do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the corresponding feature among the compounds of groups I-IV is benzene ring. However, benzene is well known in the art. Therefore, according to PCT Rules 13.1 and 13.2, benzene does not constitute a special technical feature.
